The following is an examiner's statement of reasons for allowance: the claims are allowable over the prior art of record because the prior art fails to show or suggest, either singly or in combination thereof, a synchronizing mechanism for office chairs, comprising a base carrier to be placed on a chair column, a backrest carrier which is articulated to the base carrier such that it is pivotable about a transverse axis, a seat carrier which is pivotable about a transverse axis in a region of its front end via a turning-and-sliding joint and slidable in a longitudinal direction of the seat together with the base carrier. The seat carrier is coupled with the backrest carrier such that it pivots in a region of its back end about a transverse axis, and includes a spring arrangement to actuate the synchronizing mechanism to counter its synchronized adjusting motion of the seat carrier and backrest carrier, wherein the spring arrangement incorporates at least one helical compression spring disposed essentially horizontally underneath and parallel to a sliding direction of the seat carrier, wherein for each helical compression spring a counter-bearing extension arm is provided, a front end of which is articulated to the base carrier and a rear-facing end which is freely projecting and forms a counter bearing for a rear support of the helical compression spring, and wherein the at least one helical compression spring is supported in each case with its front end on a counter bearing formed on the seat carrier.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
